TROPICAL CYCLONE BULLETIN NR. 8
Tropical Storm BASYANG (PENHA)

Issued at 8:00 AM, 05 February 2026
Valid for broadcast until the next bulletin at 11:00 AM today.

"BASYANG" ACCELERATES WHILE MOVING CLOSER TOWARDS EASTERN MINDANAO.

Location of Center (7:00 AM)

The center of Tropical Storm BASYANG was estimated based on all available data at **385 km East of Hinatuan, Surigao del Sur (8.0°N, 129.8°E).**

Intensity

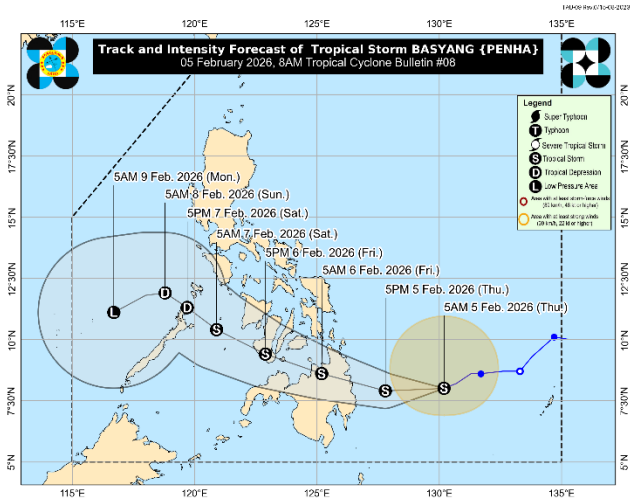
Maximum sustained winds of **65 km/h** near the center, gustiness of up to **80 km/h**, and central pressure of **1000 hPa**

Present Movement

West southwestward at 20 km/h

Extent of Tropical Cyclone Winds

Strong to gale-force winds extend outwards up to **300 km** from the center



TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.

Tropical Storm BASYANG (PENHA)
Issued at 8:00 AM, 05 February 2026
Valid for broadcast until the next bulletin at 11:00 AM today.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 24 issued at 5:00 AM today for the heavy rainfall outlook due to Tropical Cyclone BASYANG.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.
- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.

The surge of the Northeast Monsoon will also bring strong to gale-force gusts over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Batanes, Babuyan Islands, northern portion of mainland Cagayan, Aurora, Nueva Ecija, Bulacan, Metro Manila, CALABARZON, Bicol Region, Occidental Mindoro, Oriental Mindoro, Marinduque, Romblon, Cuyo and Cagayancillo Islands, Visayas, and most of Mindanao.
- **Tomorrow (06 February):** Batanes, Babuyan Islands, northern portion of mainland Cagayan, Aurora, Nueva Ecija, Bulacan, Pampanga, Zambales, Bataan, Metro Manila, CALABARZON, Bicol Region, MIMAROPA, Visayas, and most of Mindanao.
- **Saturday (07 February):** Aurora, Quezon, Bataan, CALABARZON, Metro Manila, MIMAROPA, and Western Visayas.

Coastal Flooding

There is a **minimal to moderate risk of storm surge** with peak heights **reaching up to 2.0 m** within the next 48 hours over the low-lying or exposed coastal communities of Dinagat Islands, Surigao del Norte, Surigao del Sur, Agusan del Norte, Davao Oriental, Misamis Oriental, Camiguin, Leyte, Southern Leyte, Cebu, Bohol, Negros Oriental, Negros Occidental, Antique, and Cagayancillo Islands. **Refer to Storm Surge Warning No. 4 issued at 8:00 AM today for more details.**

TROPICAL CYCLONE BULLETIN NR. 8
Tropical Storm BASYANG (PENHA)
Issued at 8:00 AM, 05 February 2026
Valid for broadcast until the next bulletin at 11:00 AM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the eastern seaboard of Visayas and Mindanao. Refer to Gale Warning No. 4 issued at 5:00 AM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 5.5 m:** The seaboard of Surigao del Sur.
- **Up to 5.0 m:** The eastern seaboards of Siargao-Bucas Grande Islands.
- **Up to 4.5 m:** The eastern seaboards of Northern Samar, Eastern Samar, Dinagat Islands, and northern Davao Oriental.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The northern and eastern seaboards of Catanduanes; the eastern seaboards of Albay and Sorsogon; the northern seaboard of Northern Samar; the remaining seaboards of Eastern Samar and Davao Oriental
- **Up to 3.5 m:** The northern seaboards of Camarines Norte and Camarines Sur; the eastern seaboard of southern Davao del Sur.
- **Up to 3.0 m:** The seaboards of Isabela and Aurora; the eastern seaboard of mainland Cagayan; the seaboard of northern Quezon; the northern and eastern seaboards of Polillo Islands; the seaboards of Camiguin; the seaboards of Misamis Oriental and Agusan del Norte
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The seaboards of Batanes, Babuyan Islands, and Ilocos Norte; the seaboard of Palawan; the southern seaboard of Bohol
- **Up to 2.0 m**: The seaboards of Antique, Cebu, Negros Oriental, Southern Leyte, Lanao del Norte, Misamis Occidental, and Sarangani; the western seaboard of Occidental Mindoro, Romblon, and Aklan; the eastern seaboard of Oriental Mindoro; the southern seaboard of Iloilo, Guimaras, and Negros Occidental; the remaining seaboards of Quezon, Bicol Region, Eastern Visayas, Bohol, Dinagat Islands, and Caraga.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- BASYANG is now momentarily moving west southwestward, then it will move generally westward until tonight before turning west northwestward beginning tomorrow (06 February) morning. On the forecast track, the center of BASYANG will make its initial landfall over Surigao del Sur between tonight and tomorrow early morning. After crossing Mindanao, it is likely to emerge over Bohol Sea tomorrow morning, and may pass close or make another landfall over Siquijor and the southern portion of Negros Oriental by tomorrow afternoon. By tomorrow evening or Saturday (07 February) early morning, it will emerge over Sulu Sea, then traverse the northern portion of Palawan between Saturday afternoon and evening.
- BASYANG may further intensify prior to its initial landfall. It will then slightly weaken as it interacts with the landmass but it will likely remain a tropical storm. Further weakening into a tropical depression is forecast by Saturday and will be downgraded into a low pressure area by Monday (09 February).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
